

10th Hole – 492m Mens & 470m Ladies – Par 5

From a raised tee, the drive should be placed in the right hand side of the fairway to best negotiate a dogleg to the left. A plantation of trees guard the corner and waits for any shots that might come their way. With each year, the number of golfers who are prepared to take on the corner decreases.

Lateral water hazard markers run along the latter right hand side of the fairway.
